EDUCATION

Stanford University

Stanford, CA

B.S. Computer Science | GPA: 3.98/4.00 | SAT: 1600

Expected June 2029

- Activities: Stanford Women in Finance, Stanford Women in Investing, Stanford Women in CS (Board), Club Golf

EXPERIENCE

Hedge Fund Analyst Intern

June 2026 – August 2026

Rogers Investment Advisors (Asset Management, \$2.4B group AUM)

Tokyo, Japan

- Researched exit routes and sector funding across Japan's startup and VC ecosystem; presented to principals and the investment team that M&A and business transfers, not IPOs, account for the majority of recent exits.
- Automated fund PDF performance-table extraction in Python, roughly halving verification time across 300+ funds.
- Wrote 20 fund overviews covering strategy, performance, holdings, and key terms for internal investment research.

Software Engineering Intern

July 2025 – August 2025

Accordance AI (Khosla/GC/Sequoia-backed AI startup)

San Francisco, CA

- Built a Python tool to score daily user feedback by context length, regulatory complexity, and task type.
- Ran benchmarking algorithms on the scored entries to measure performance by category and pinpoint model weaknesses; presented findings to engineering, product, and GTM teams.

VC Analyst Intern

June 2025 – July 2025

Polaris Partners SF (Healthcare & Life Sciences VC, \$5B AUM)

San Francisco, CA

- Screened 80+ AI healthcare startups across capacity management, care navigation, and inpatient monitoring.
- Evaluated TAM, product defensibility, regulatory risk, and clinical positioning; advanced 20 for principal review.
- Engaged directly with founders across 5+ calls to evaluate product roadmaps and pilot traction.

Financial Research Intern

July 2024 – August 2024

Stanford Pacific Fund (Hedge Fund)

Palo Alto, CA

- Built a Costco DCF across three growth scenarios; all valued the stock below market price.
- Analyzed quarterly earnings, gross margins, and membership fee trends to assess the business.
- Presented the analysis and overvaluation conclusion to the fund's CEO.

Research Assistant

June 2023 – August 2024

UC Santa Barbara Department of Economics

Santa Barbara, CA

- Analyzed 1M+ Ethereum transactions (\$125B volume) in R to measure how Uniswap's 2023 default slippage change altered trader behavior; found 4x growth in use of the 0.1% setting.
- Co-authored the resulting paper (SSRN); presented at departmental poster session and 100-person symposium.

LEADERSHIP

Director of Education

March 2026 – Present

Stanford Women in Investing

Stanford, CA

- Managed 5-7 finance seminars/quarter covering financial statements, DCF, and sourcing; grew membership 3x.
- Designed pitch construction seminar for the club's year-end stock pitch competition.

SELECTED PROJECTS

Institutional Holdings Analysis | SEC EDGAR 13F, Python

January 2026 – Present

- Parsed 58M+ institutional holding records (2021–2025) to trace sector rotation; found technology's share of institutional AUM grew from ~53% to ~60% over the period.
- Mapped correlations across 100 funds; passives clustered tightly, while quant/multi-strats stood apart.

M3 Math Modeling Challenge | Semifinalist, 12/794 teams · \$1,500 scholarship

2025

- Modeled heat conduction across Memphis neighborhoods and trained ML models to forecast energy demand.

SKILLS & INTERESTS

Technical: Python · C/C++ · R · Git · Raspberry Pi · Pandas · NumPy

Finance: Excel · Bloomberg · Equity Valuation (DCF) · Industry & Competitive Analysis · Market Research

Interests: Scratch golfer, AJGA best rank top 500 · Classical pianist, SF Conservatory of Music (2015–2025)
